

COVID-19 Virus

March 18th, 2020

The Marshall Polk Rural Water System is monitoring the coronavirus on an ongoing basis. There is a lot of misinformation and fear related to this virus pandemic. Rest assured, the water produced by the Marshall & Polk Rural Water System is safe to drink and use as normal. The existing management techniques and disinfection processes are designed to keep our water safe and all systems at this time are working properly.

In order to protect all involved, we are limiting our service calls that require operators to enter a residence to emergencies only. This will be in effect until April 1st, and will be reevaluated at that time. We are operating at full staff and are ready to respond to any disruption of water service, as normal.

If you have any questions or concerns please do not hesitate to contact us at (218) 745-5471 or (800) 569-1367.

Below are some trusted websites that have the latest information on the COVID-19 Virus:
